INTRODUCING AN INNOVATIVE TRAILER DESIGN

Unlike conventional enclosed trailers, the lightweight TFT models can be hauled using small cars or SUV's. You no longer require a full size truck for your hauling needs.

The TFT LP1000 is a low profile lightweight trailer; ideal for hauling your toys, tools or whatever you need moved. The list is endless; you need only use your imagination.

If extra height is a requirement, the model TFT HP1000 gives an extra seven inches interior headroom.

The end gate folds down to serve as a drive-up ramp, eliminating the need for handling and storing bulky removable ramps.

The unique patented lift design for the canopy allows easy access to the trailer, and when closed, it gives a secure, weatherproof interior and can be locked using regular padlocks providing all the protection your worldly goods deserve.

**Lightweight,
Durable,
Low-Cost**
**The ideal solution
for your hauling needs.**
